

FOR IMMEDIATE RELEASE

HYTHE ENGINEERING APPOINTS PAUL DINGLEY AS BUSINESS DEVELOPMENT DIRECTOR TO STRENGTHEN MARKET POSITION IN THE DEFENCE AND NUCLEAR SECTORS

[Portsmouth, Hampshire, UK – 3rd November 2025] Hythe Engineering Ltd, a leading provider of precision engineering, fabrication, welding and pipefitting services across maritime defence, nuclear and other highly-regulated critical infrastructure sectors, is pleased to announce the appointment of Paul Dingley as its new Business Development Director.

In this new role, Paul will be responsible for driving Hythe Engineering's strategic growth initiatives, strengthening client relationships and identifying opportunities that build on Hythe Engineering's strong reputation for delivering exceptional results across defence and nuclear sectors.

Having previously held senior positions with Delkia, Thales and QinetiQ, Paul brings a wealth of experience to Hythe Engineering having demonstrated a strong track record in developing strategic partnerships and supporting clients through technical excellence and reliability while delivering complex engineering projects.

"I am excited to help grow our partnerships, ensuring delivery to customers and building upon the foundation already in place," said Paul. "Hythe Engineering has an incredible reputation, and I look forward to working with the team to support existing clients while expanding into new markets."

"Paul's appointment is an exciting addition to our leadership team," added Alex Moore, Managing Director of Hythe Engineering. "His energy, commercial insight, and industry experience will help us continue to grow, while maintaining the quality and reliability our customers expect."

The appointment reflects Hythe Engineering's commitment to expanding its nuclear footprint, alongside continuing its important and long-standing work in the defence sector.

ABOUT HYTHE ENGINEERING

Hythe Engineering is a leading provider of turnkey engineering, manufacturing and repair services, serving clients across maritime defence, nuclear and other highly-regulated critical infrastructure sectors. Hythe's comprehensive service portfolio spans a wide array of specialised skills and techniques – including multiple welding disciplines, advanced fabrication processes and intricate pipework solutions – enabling us to tackle complex and evolving challenges faced by our clients with precision and confidence.

Headquartered in Portsmouth – home to the oldest British naval base, HMNB Portsmouth – Hythe's strategically located teams hold full security clearance, making us ideally positioned to carry out both planned and rapid-response work across the UK.

Committed to quality, agility and reliability, Hythe Engineering is the trusted partner for some of the UK's principal Defence, Nuclear and Renewable sector contractors and organisations seeking engineering solutions tailored to meet their exact requirements.
